The End Point Assessment organisation will determine the overall grade of Fail, Pass, or Distinction.

Maths, English and Functional Skills within the Apprenticeship

All apprentices have the opportunity to develop English and maths skills as part of their apprenticeship and will need to develop skills sufficient for competence in their chosen apprenticeship standard.

A 16-18 year old must complete functional skills qualifications if they do not hold existing qualifications.

An individual aged 19 or over that does not hold existing qualifications, should decide with their employer if they would like to achieve functional skills but these would not be needed to achieve their programme.
